### NeuralMetrics Awarded Best Product in AI and Data Category

**NEW YORK, March 13, 2024** — [NeuralMetrics](#), a leading provider of AI-powered commercial insurance underwriting data, was today recognized as a winner in the Top AI and Data product category of the 2024 Product Awards. The 7th Annual Product Awards, presented by Products That Count in partnership with Mighty Capital and Capgemini, is the only awards program designed to celebrate solutions that help advance the work and contributions of product managers. NeuralMetrics AI capabilities optimize data-driven risk evaluation, adding significant value to the management of insurance products such as general liability, lessor's risk, and commercial property.

The Products That Count product manager network selected worldwide nominees, and an independent Awards Advisory Board comprised of top product leaders chose the winners. This year's board includes product leaders from S&P Global, Bank of America, and Amazon's Twitch.

NeuralMetrics uses leading-edge AI technology and tools to deliver diverse data from public sources for commercial insurance risk assessment. With the proprietary AI capabilities of NeuralMetrics, underwriting teams at insurers and managing general agents (MGAs) can access detailed risk insights from the web in real time. The company provides an [underwriting data workbench](#), powered by generative AI and large language models (LLMs). NeuralMetrics also just announced the launch of its [A-Star \(A\\*\) platform](#), consisting of cognitive, self-learning GenAI agents, which can assume a variety of underwriting personas and automate a range of risk-assessment tasks.

*-more-*

“NeuralMetrics is thrilled to be recognized by Products That Count for our work in advancing instantaneous, AI-enabled access to risk data for insurance underwriting,” said Prakash Vasant, CEO of NeuralMetrics. “Commercial insurance product managers face changing market conditions, evolving policyholder expectations, and exacting regulatory requirements in striving to provide productive insurance coverage to businesses. As partners to insurance organizations of all sizes, NeuralMetrics continues to push AI boundaries and improve underwriting efficiency with on-demand access to risk-quality data.”
